Key Features

- An engaging story about corporate espionage, and what it is to be human as the line between biology and technology begin to blur
- Cross-genre mechanics that allow for skill-expression and engaging, flow-state gameplay.
- Collect items that persist run to run to customize your loadout & tune your build.

Narrative

Tracey and Alice are a pair of Console Cowgirls on a mission.

Their goal is to hack in to the network of a global med-tech conglomerate in search of information related to a deadly defect in the hottest new tech worldwide: neural machine interfaces.

Can they crack through 100 layers of security and uncover the secrets of The Company before countless lives are destroyed by corporate negligence?

Can their own potentially defective interfaces survive the attempt?
